Magnolia Developer Training 6.2

ÁRBOL DE PÁGINAS

Setup and Teaching

Light Development

- [Setup] Light-Development Environment
 - Environment Installation Guide: Light-Development Training
 - Environment Self-Check: Light-Development Training
- Light Development Base
- Templating: FreeMarker
- Website Development
- JS Back-End Magic
- (O) Additional Material LD

Environment Self-Check: Light-Development Training

Coverage

- Purpose
- Check
 - 1. Directory structure
 - 2. CLI: mgnl start
- When the training course starts
- Need Help?

Purpose

- Ensure the development environment on your machine is working properly for the training course.
- Provide a possibility to self-check upfront before the remote training course starts.
- Verify whether the Environment Installation Guide: Light-Development Training has been done properly.

Check

Check the following steps to ensure your development environment works properly.
Before starting the checks, **restart your laptop!**
Quite some problems show only up after a restart (not saved JAVA_HOME variable etc).

1. Directory structure

We test the created directory structure of the training setup done in: 6. Install and run Magnolia
1. **Check directory structure** you created in your file system, it should look alike this:

magnolia-training

magnolia-jumpstart

apache-tomcat

downloads

light-modules

training-light-development-modules

You created this structure during the installation guide in:
6. Install and run Magnolia → chapter "**Create needed folder structure**"

2. CLI: mgnl start

We test the tomcat bundle installed and started in this step: 6. Install and run Magnolia
1. **Check if** you can **start** the Magnolia instance:
Ensure the command 'mgnl start' works as described in
6. Install and run Magnolia → chapter "**Ensure 'mgnl start' works**"

When the training course starts

Please ensure the following before the start of the training course:

- The CLI created **Standalone Tomcat Bundle is running!**

Need Help?

- For help on problems, you can contact your assigned Magnolia trainer.
- You should get the contact information of your assigned trainer after your training course subscription.
- Also you can use the **'Installation help session'** scheduled **the afternoon before** the **training** starts.
